# INTERIOR FITOUTS

A Work-space design is nowadays intended to foster employers relationships and engagements. After all, it is the only place where people spend most of their time and hence, it becomes influential if the space around them motivates and comforts them amidst all the stress of meetings and work deadlines

The office should highlight function-driven planning with efficient design ideology to poise the elements of barrier-free minimalism

**"Quality means doing  
it right when no one  
is watching."  
- Henry Ford**

## THE OBJECTIVE

Interio looks to render a space that nurtures comfort and functionality with easy-going and people-centric furniture and interiors that shattered closed cluster model.

The design is aimed at integrating and envisioning a human-centric approach, to bring in more energy, productivity, and technology into the place.
